BK-T12 · Kestrel Trading

Red — Blocked — must not ship until fixed

Manchester -> Frankfurt (Germany) · Warehouse · priority Cheapest · checked against 25-10-2026

Confirmation

Once the issues above are fixed, your 3 pallets (86 cartons of 2 different products, £5,000.00) will be collected from Manchester on Monday 26-10-2026 by Carrier B Road standard and should arrive at the Frankfurt warehouse on Thursday 29-10-2026 (estimated delivery). Freight: £660.00.

What happens next

1. Fix the 6 blocking issues above, then upload the file again.
2. Book or confirm the delivery appointment at the Frankfurt warehouse for Thursday 29-10-2026 or later.
3. Complete the commercial invoice (checklist below) and attach it to the shipment.
4. Label every carton “1 of 86” ... “86 of 86”.
5. Have the pallets wrapped and ready for collection on Monday 26-10-2026.
6. Share the estimated delivery date with the receiver.

Issues (9)

Rule	Severity	What is wrong	How to fix
R-01	Red	MUG-01 (Ceramic coffee mug, 350 ml) has HS code 90111, which is only 5 digits (minimum 6).	• If the real code is 090111, Excel removed the leading zero. Format the HS code column as Text and re-enter 090111. • Use the full code with at least 6 digits (e.g. 901110 if the remaining digits are 0 — check the tariff to be sure).
R-02	Red	Declared value is £5,000.00 but the items add up to £5,450.00 (MUG-01: 1080 x £5.00 = £5,400.00; PB-01: 10 x £5.00 = £50.00). The declared value is £450.00 (8.257%) lower; the limit is 1% (£54.50).	• Change the total declared value to £5,450.00. • Or, if the declared value is right, correct the quantity or unit price of the item(s) that are wrong. • Customs uses the declared value to set duty and VAT — an under-declared value can cause a customs hold or a penalty.
R-03	Red	MUG-01 (Ceramic coffee mug, 350 ml): 12 units per carton x 85 cartons = 1020 units, but quantity is 1080 (60 units more than fit). The receiving warehouse will count a mismatch.	• If the quantity (1080) is right: cartons should be 90 (1080 / 12). • If the cartons (85) are right: quantity should be 1020 (12 x 85).
R-04	Red	Booking says 84 cartons, but the items add up to 86 (MUG-01: 85 + PB-01: 1). Difference: 2 cartons.	• Change the booking's cartons to 86. • Or, if 84 cartons are really being shipped, an item is missing or its carton count is wrong — add or correct it.
R-05	Red	1600 kg / 3 pallets = 533.33 kg per pallet, over Carrier A Road economy's limit of 500 kg (by 33.33 kg). The carrier would refuse the pallets at collection.	• Spread the load over at least 4 pallets (1600 kg / 4 = 400 kg per pallet) to keep Carrier A Road economy; freight would be £720.00. • Or switch to Carrier B Road standard (max 750 kg/pallet) at £660.00, arriving 29-10-2026. • Also double-check the total gross weight and pallet count — a typo here is common.
R-06	Red	PB-01 (Lithium-ion power bank) looks like lithium batteries (matched: lithium, power bank, HS 850760). These can't go on this service.	• Remove this item from the shipment. • If the description is misleading (e.g. the product has no battery), correct the description to say so and re-check. • Restricted goods need a specialist dangerous-goods service, which isn't offered here.
R-08	Amber	This shipment goes to a warehouse in Frankfurt, but no delivery appointment is booked. Warehouses usually turn away trucks without a slot, which causes re-delivery fees and delays.	• Book a delivery slot with the receiving warehouse for on or after the estimated delivery date, then update this booking to Yes. • If the address is actually a shop or office, change the destination type to Business address.
R-09	Amber	MUG-01 (Ceramic coffee mug, 350 ml) has no	• Add where MUG-01 was manufactured: United

Rule	Severity	What is wrong	How to fix
		country of origin. Customs needs to know where the product was made (not where it ships from) to set the duty.	Kingdom, China, India, Vietnam, Turkey, Germany.
R-10	Amber	Ready to ship date is 01-10-2026, 24 days before today (25-10-2026). A carrier can't collect in the past, and delivery estimates will be wrong.	• Enter the real date the goods will be packed and ready — today (25-10-2026) or later. Earliest collection would be 26-10-2026.

Rule results

Rule	Check	Result
R-01	Every item must have an HS code of at least 6 digits	fail
R-02	Total declared value must equal the sum of quantity x unit price across all items (within 1%)	fail
R-03	For each item, units per carton x cartons must equal quantity	fail
R-04	Total cartons on the booking must equal the sum of cartons across all items	fail
R-05	Weight per pallet (total gross weight / pallets) must not exceed the chosen carrier's max weight per pallet	fail
R-06	No lithium batteries, aerosols or flammable liquids	fail
R-07	Total gross weight must be at least the sum of unit weight x quantity across all items	pass
R-08	Shipments to a warehouse must have a delivery appointment booked	fail
R-09	Every item must have a country of origin	fail
R-10	Ready to ship date must not be in the past	fail

Carrier — Recommended once fixed

Carrier B Road standard: £660.00 · 3 working days · 95% on time · collection Monday 26-10-2026 · estimated delivery Thursday 29-10-2026.

It's the lowest price on this route for 3 pallets. Recommended once the issues above are fixed. The ready date 01-10-2026 is in the past, so estimates assume collection from today.

Option	Cost	Transit	On time	Max kg/pallet	Est. delivery	Eligible
Carrier A Road economy	£540.00	5 days	92%	500	02-11-2026	No — 533.33 kg per pallet is over its 500 kg limit
Carrier B Road standard	£660.00	3 days	95%	750	29-10-2026	Yes
Carrier C Road express	£1,020.00	2 days	98%	400	28-10-2026	No — 533.33 kg per pallet is over its 400 kg limit

Tips (UK export guidance)

A-02 Made outside the UK — EU import duty may apply: PB-01 (Lithium-ion power bank) was made in China. Goods must originate in the UK (or EU) to qualify for zero tariff under the UK–EU Trade and Cooperation Agreement, so duty may be charged on arrival.

A-06 Full commodity code recommended: PB-01 (Lithium-ion power bank) has a 6-digit HS code (850760). That passes our check, but UK export declarations use an 8-digit commodity code and EU import declarations a 10-digit one.

Commercial invoice checklist (A-08)

Invoice element	Status	Detail
Invoice number and date of issue	partial	Draft number INV-BK-T12-25102026; add the issue date.
Seller and buyer: full name, address, contact	partial	Seller: Kestrel Trading. Add full addresses and the buyer's details.
Consignee (final recipient) if different from the buyer	to add	Deliver to the Frankfurt warehouse; name the consignee if it isn't the buyer.

Invoice element	Status	Detail
Related paperwork (purchase order, proforma, contract)	to add	Add the PO or contract number and date.
Unit price, payment method, currency, discounts	partial	Unit prices in GBP are on file. Add payment method and any discounts or extra charges.
Quantity, gross and net weight, packages	have	1090 units; gross 1,600 kg; net 543 kg; 86 cartons on 3 pallets.
HS code and plain-English description	partial	Fix the HS code issue (R-01) first.
Incoterms agreed with the buyer	to add	Incoterms: to be agreed (e.g. DAP).
Package marks and numbers	have	Cartons marked 1 of 86 ... 86 of 86.
Country of origin of the goods	partial	Add the missing country of origin (R-09).
Transport details (means and route)	have	Road freight, Manchester -> Frankfurt, Carrier B Road standard.
Total value of the goods	partial	Items total £5,450.00; declared £5,000.00.
Additional charges (freight, insurance, certification)	partial	Freight £660.00; add insurance if any.
Additional language versions	to add	English is usually fine; check with the buyer.
Certification (Chamber of Commerce / embassy)	to add	Check whether the destination market needs it.
